

## How to Build a PVC Target Holder

*These handy and inexpensive target holders are perfect for patterning turkey loads to sighting in scoped rifles.*

### INSTRUCTIONS

1. Materials: (4) 2-inch PVC "T" sections, 7-foot section of 2-inch PVC pipe and PVC pipe glue.
2. Cut 7-foot section of pipe into the following pieces: (4) 12-inches (feet), (4) 4-inches (upright holder) and (1) 20-inches (crossbar).
3. Assemble and glue both foot sections and crossbar as shown in photograph.
4. Insert foot section at each end of crossbar and twist into position.
5. Insert two 6-foot long, 1-inch by 2-inch furring strips for upright posts.
6. Staple or clip cardboard backing to each furring strip.
7. Center paper target on cardboard and affix with staples, adhesive or tape.
